The screenshot shows a Freelancer.com profile for a user named Yousef M. (@yousefmohamed746). The profile features a background image of architectural blueprints. At the top, there's a placeholder for a cover photo with a 'Upload cover photo' button and a 'View client profile' button. Below the profile picture, there are tabs for 'General' and '+ Add profile'. The user has a 0.0 rating, 0 reviews, \$0.0 earnings, and 0% completion. The skills listed are 'Front end'. The user joined on December 2, 2023, from Egypt. The bio states: 'Passionate and detail-oriented Frontend Developer with expertise in creating responsive, user-friendly web applications. Proficient in HTML, CSS, JavaScript, and modern frameworks like React.js. Skilled in transforming UI/UX designs into high-performance, interactive websites.' A 'Messages' section is visible at the bottom.

The screenshot shows an Upwork profile for Yousef M. The profile picture is a circular image of a person in a dark hoodie. The name 'Yousef M.' is displayed prominently. Below the name, it says 'Giza, Egypt – 12:28 am local time'. There are buttons for 'See public view' and 'Profile settings'. A 'Share' button with a green arrow icon is also present. On the left, there are sections for 'Promote with ads', 'Availability badge' (set to 'Off'), 'Boost your profile' (set to 'Off'), and 'Connects: 0'. It includes links to 'View details' and 'Buy Connects'. The main content area shows a job listing for a 'Full-Stack .NET Developer' with a rate of '\$20.00/hr'. The job description highlights skills in ASP.NET Core, C#, React, SQL, Azure, Blazor, and GraphQL. Below the job listing is a 'Portfolio' section with tabs for 'Published' and 'Drafts'. A small orange progress bar at the bottom indicates 0% completion.

Full Stack Developer - Enterprise SaaS - Svelte / Tailwind, Javascript, .NET Core (C#)

Posted 2 hours ago  Worldwide

 Specialized profiles can help you better highlight your expertise when submitting proposals to jobs like these. [Create a specialized profile](#).

We've just landed our first enterprise client (a World Bank backed climate finance fund) and need a developer to join our team as we scale from MVP to enterprise-grade solution. This is a ground-floor opportunity to work on a product with significant social impact.

The initial sprint will focus on implementing enterprise user management features, working alongside senior developers. This will involve regular periods of intensive work as we implement new features and ensure existing features perform reliably, at scale.

The company is 100% remote, and we're open to contractors in North/South America and European time zones (UTC-7 to UTC+1).

Key Requirements:

Strong foundation in .NET Core (C#) development
Experience with or strong interest in modern frontend development (Svelte/Tailwind)
Basic understanding of authentication/authorization concepts
Ability to write clean, maintainable code and follow best practices
Strong communication skills and ability to work in a remote team environment

 You'll need Connects to bid. They're like credits that show clients you're serious. [Learn more](#)

Technical Proposal

Subject: Full Stack Developer Application – Enterprise SaaS

Dear [Hiring Manager's Name],

I am excited to apply for the Full Stack Developer position at [Company Name]. With extensive experience in **.NET Core (C#), JavaScript, and modern frontend frameworks**, I am confident in my ability to contribute to your enterprise SaaS platform as it scales.

My Expertise Includes:

- Backend:** .NET Core (C#), Docker, MySQL/PostgreSQL, Redis, AWS
- Frontend:** Svelte, TailwindCSS, JavaScript
- Authentication & Security:** OAuth, JWT, Role-Based Access Control
- Performance Optimization:** Caching strategies, database tuning, scalable architecture

Answers to Your Questions:

1 Rescuing a Project in Jeopardy:

I once worked on a SaaS product experiencing **severe database performance issues** under heavy load. After profiling queries, I optimized indexing, implemented caching, and refactored key stored procedures. The result? **A 10x speed improvement and reduced infrastructure costs.**

2 Most Unexpected Solution:

While building a high-traffic API, I faced an issue with **latency spikes**. After deep debugging, I discovered that a third-party library caused memory leaks. Instead of replacing the entire library, **I used a background task to recycle instances dynamically**, cutting response times by 40%.

3 Using AI Copilots:

I integrate AI copilots (GitHub Copilot & ChatGPT) into my workflow for:

- ◊ Rapid prototyping & boilerplate generation
- ◊ Code reviews & security auditing
- ◊ Automated test case suggestions

4 Delegation:

I handle all my tasks directly and collaborate closely with teams but do not outsource work.

I look forward to discussing how my expertise can drive the success of your SaaS platform.

Best regards,

Yousef.

Financial Proposal

Subject: Financial Proposal – Full Stack Developer for Enterprise SaaS

Dear [Hiring Manager's Name],

Based on the job scope and expected workload, I propose the following rates:

 **Hourly Rate: \$XX per hour** (based on expertise and enterprise-level development)

 **Availability: [e.g., 30-40 hours per week]**

 **Engagement: Long-term commitment with flexible scheduling for sprints**

My rate reflects:

- ✓ Proven experience in **scalable enterprise solutions**
- ✓ **Full-stack expertise** (Frontend, Backend, DevOps)
- ✓ Commitment to **high-performance, secure, and maintainable code**

I am open to further discussion regarding workload distribution and specific deliverables.
Looking forward to collaborating with your team.

Best regards,
Yousef
